THE MOST COMFORTABLE STERNUM SUPPORT BAND, SUITABLE FOR EVERY PATIENT AFTER STERNOTOMY

SternaSafe®

SternaSafe® is an active sternum support band which, as a preventive measure, is worn by patients immediately after sternotomy. SternaSafe® products are used very successfully in many heart centers worldwide.

Perfect physical and mental help from the first day after surgery up to 4 weeks at home

- easier coughing and breathing, less pain
- reduces sternum complications
- faster recovery, maximum patient comfort
- earlier hospital discharge
- faster mobility
